M3D Receives Prestigious Award in Spain

Meyer Sound's M3D™ line array was honored with the "Best Sound Reinforcement Product" award at the premiere Producción Profesional & Producción Audio Awards. The ceremony, which will be held annually, took place on November 4 in conjunction with the Broadcast '03 conference at Madrid's IFEMA convention center.

The award was accepted by Rafael Jimenez, general manager of Meyer Sound Spain. "This latest award not only recognizes the M3D's advanced audio technology," says Jimenez, "but it also confirms the astonishingly rapid acceptance that the entire M Series has enjoyed throughout the sound reinforcement markets of southern Europe."

This professional production awards ceremony for the Iberian Peninsula was sponsored by Bolina Editorial, publisher of industry-related trade magazines for the Spanish, Portuguese and Brazilian markets.

Nominees for the awards were submitted via the Internet by the magazines' readers, with final award selection made by a jury comprising a cross-section of production professionals.

More than 600 production industry professionals attended the gala awards event, which featured live music by saxophonist William Gibbs and the Orchestra Metrópolis. Audio for the evening's festivities was heard through a Meyer Sound system provided by the Madrid office of Congres Réntal Ibérica.

ABOUT MEYER SOUND

Meyer Sound Laboratories, Inc. designs and manufactures high quality sound reinforcement loudspeakers, studio monitors, equalizers and sound measurement tools for the professional audio industry. Founded in 1979 by John and Helen Meyer, the company has grown to become a leading worldwide supplier of systems for theaters, arenas, stadiums, theme parks, convention centers and touring concert sound rental operations. Meyer Sound's main office and manufacturing facility are located in Berkeley, California, with field offices and authorized distributors located throughout the USA and around the world.
