**Meyer Sound PLASA Giveaway Includes Trip to California**

Meyer Sound will be serving up prizes as well as great sound at their stand at the upcoming PLASA show in London. Drawings will be held each day, and the last day of the show will see one lucky attendee awarded with the Grand Prize: a four-day, three-night trip for two to the San Francisco Bay Area.

Entering to win is easy: simply attend one of the presentations happening on the Meyer Sound stand to obtain an entry form, then answer the fun questions on the form, drop off your entry, and wish for luck! Entry forms will be submitted for that day's drawing, as well as the Grand Prize drawing.

At the end of each day, a drawing will be held from all entries submitted during the day and winners will receive jackets, hats, and other items bearing the company's distinctive logo. Entrants must be present to win at the daily drawing.

At 4 p.m. on Wednesday, September 15, the drawing will be held for the Grand Prize. It is not necessary to be present to win the Grand Prize drawing. The winner will be treated to a trip that will include the sights of San Francisco and the nearby Wine Country, tickets to Meyer Sound's exclusive 25<sup>th</sup> Anniversary party in October, admission to the 117<sup>th</sup> Audio Engineering Society convention and a visit to Meyer Sound's Berkeley headquarters.

Meyer Sound Laboratories will be located at stand E30.

**ABOUT MEYER SOUND**

Meyer Sound Laboratories Inc. designs and manufactures high quality sound reinforcement loudspeakers, studio monitors, equalizers and sound measurement tools for the professional audio industry. Founded in 1979 by John and Helen Meyer, the company has grown to become a leading worldwide supplier of systems for theaters, arenas, stadiums, theme parks, convention centers and touring concert sound rental operations. Meyer Sound's main office and manufacturing facility are located in Berkeley, California, with field offices and authorized distributors located throughout the USA and around the world.
